

**TOCC Public Services Committee
Agenda
September 15, 2016**

- This meeting is open to all Town residents
- Introductions and introduce new PSC member, Jen Burton
- Reminder to Council that PSC is requesting direction on the West Avenue traffic/parking plan based upon St. John's/Oneness School support of the Jaffe development plans
- John Bickerman – Discuss highlights of the September Council Meeting; Next Council Meeting October 12th
- Discuss the traffic issues in the vicinity of CCES; request was made for a wider Town wide traffic study; collect data to establish a “baseline” for traffic counts before new development kicks in. Todd to discuss this with (Mayor) Scott Fosler
- Streetlights and Streetlight Requests – The Town is currently processing a request for the 7600 block of Meadow Lane; two (2) street lights have been installed at that location; no other requests have been received
 - Currently, the Neighborhood Watch committee (NWC) is under the Community Relations Committee umbrella. Wicca Davidson is suggesting that she thinks that it should be under the PSC. The PSC is not opposed to this however, it will be up to the Council to authorize this switch/change
- PSC made recommendation to Todd/Council to install a pole light (similar to the ones installed on E-W Hwy.) in the Willow Lane Park near the existing bench. On September 8th Dave Walton advised that they had the necessary cost proposals for the work and the cost is higher than originally thought due to a new meter being required and running the power underground from an existing pole. Dave advised that Todd plans to check with the Council to see if they are willing to authorize the unbudgeted expense
- PSC is looking into other Fall agenda items (Permit parking, parking in/around CCES, speed enforcement, etc.)
- Next Meeting – Thursday, October 13th at 7 PM
- Adjourn
