

The Triple R (Reduce Reuse Recycle) Subcommittee (formerly the Plastics Subcommittee) of the Climate and Environment Committee met on October 8 in the Town Hall. In addition to renaming our committee to reflect our increased mission, we reviewed the current situation with recycling, including the town's temporary solution for glass recycling. We commend the town for its successful implementation of a temporary solution to glass recycling that has kept almost 2 ½ tons of glass from being incinerated or landfilled! We also plan to continue to investigate recycling best practices, and work on ways to educate residents about ways to make our own recycling practices better.
