

# CHEVY CHASE GREEN TOWN FAIR

**SATURDAY SEPTEMBER 22 FROM  
10 AM – 2 PM RAIN OR SHINE**

**Did you know that greening your home can increase its value by as much as 7%?**

Our Green Town Fair will provide specific information on how you can **lower your carbon footprint**.

From how you maintain your home or tend to your yard to what you eat or buy, exhibitors and speakers will be on hand to give you the straight scoop!

We'll be having our popular **Plant Exchange** along with opportunities to learn about and contribute your thoughts on the **Lee Dennison Sustainable Garden Project**.

Being green can be easy and fun – join us!

## **CONNECT WITH NEIGHBORS & CELEBRATE THE START OF FALL!**

### 11:30 am Speaker Presentation: Marcie Meditch

#### Deep Green Residential (r)Evolutions

For over 30 years, Marcie Meditch and her partner, John Murphey, have made sustainable design an integral part of their practice at Meditch Murphey Architects. Their past projects include construction of Platinum-rated LEED-H homes, conceptual designs for Living Community Challenge neighborhoods and net zero energy residences.

Ten years ago we undertook what we refer to as a ‘Deep Green’ dive into a net zero agenda for our office. 3 of our projects will demonstrate not only an evolution in our thinking on sustainable residential design but also a revolution in materials and technology, that have been implemented with each new project we undertake.

### 12:15 pm Speaker Presentation: Michael Whelan

#### Live Green or Fry

The world’s climates are changing with higher and lower outdoor temperatures over longer periods of time during the year.

What can you do to your home to reduce energy usage and increase comfort while still maintaining a healthy home environment?

### 1:00 pm Community Forum: Lee Dennison Sustainable Garden

Lee Dennison, a long time resident of the Town, passed away on August 31, 2012. Lee has been remembered by many residents for her devotion to the arts, many social causes, extensive exotic world travels, her laugh and wit, her insatiable curiosity, and steadfast devotion to lifelong friends who were her family.

As an example of her generosity, she arranged a bequest to support the beautification of public space within the Town. For the last few months, many volunteers within the Town have been working towards the establishment of the **Dennison Sustainable Garden**. We invite you to the Community Forum to learn more about the project and provide your feedback.
